EDUCATION CERTIFICATES

Senior Technician - Industrial Maintenance
I.T.E.E.M , Algeria | Feb 2013

Certificate for Lifting/Overhead Crane Operations and Inspection of Lifting Tools

SKILLS

- Technical Proficiency
- Attention to Detail
- Troubleshooting Skills
- Teamwork
- Microsoft office
- Hands-On Skills
- Communication Skills

LANGUAGES

- Arabic (Mother Tongue)
- French (Excellent)
- English (Advanced)

ABOUT ME

Dedicated and skilled Turbines Mechanical Technician with 10 years of experience in the maintenance, repair, and optimization of turbine systems across various industries, including power generation and aerospace. Proficient in diagnosing mechanical issues, performing routine inspections, and executing complex repairs to ensure optimal performance and reliability of turbine equipment. Strong understanding of turbine mechanics, thermodynamics, and fluid dynamics, complemented by hands-on expertise in alignment, balancing, and vibration analysis.

EXPERIENCE

Algesco (GE, Sonatrach, Sonelgaz) , Algeria

Mechanical Technician 2020 - Present

- Perform routine maintenance on turbine systems, including inspections, lubrication, and parts replacement.
- Diagnose mechanical issues and conduct repairs on turbine components such as bearings, seals, and rotors.
- Assemble and disassemble turbine units for maintenance or inspection.
- Ensure proper alignment and fit of components during reassembly.
- Utilize diagnostic tools and techniques to identify mechanical failures or inefficiencies in turbine operations.
- Adhere to all safety protocols and regulations to ensure a safe working environment.

Wilson's Service For ALGESCO , Algeria

Mechanical Technician 2014 - 2019

- Diagnose mechanical issues and conduct repairs on turbine components such as bearings, seals, and rotors.
- Perform routine maintenance on turbine systems, including inspections, lubrication, and parts replacement.
- Maintain detailed records of maintenance activities, repairs performed, and parts used.
- Use of main mechanical measuring equipment (micrometers, comparators, calipers, etc.).
- Assembly and disassembly of axial compressor discs, gas turbine wheels, blades of all gas turbines.
- Assembly and disassembly of valves , Balancing of all rotors.

Practical Internship Sep 2012 Jan 2013

- Support ongoing projects by gathering data, conducting research, and assisting in project management tasks.
- Participate in team meetings and contribute ideas for project improvements.
- Analyze technical data related to oil and gas production, exploration, or refining processes.
- Prepare reports summarizing findings and presenting them to supervisors.
- Participate in field visits to oil and gas production sites to gain practical insights into operations.
- Assist engineers and technicians in troubleshooting equipment issues or optimizing processes.
- Familiarize myself with safety protocols and assist in ensuring adherence to safety regulations.
- Participate in safety training sessions and drills.
- Attend workshops, seminars, or training sessions to enhance professional knowledge and skills.
